Who We Are

About Us

Software Product @ Cal (SPC) is the first student chapter of the International Software Product Management Association, committed to building a community focused on product management and technology

Project Approach

Every semester, SPC works on up to 4 different projects. Each project team is comprised of one to two Project Leaders, four to six Consultants, and two to three Senior Advisors. We develop a statement of work upfront and engage in regularly scheduled check-ins.

Our Students

Student Background

Our consultants come from a wide range of educations, majors, and experiences. We leverage our unique backgrounds in conjunction with UC Berkeley resources, extensive data analysis, and first-hand interviews to conduct our research and synthesize our ultimate recommendations.

Why Partner?

Insights

Our project teams are curated with our consultants' unique skills as well as client needs in mind. As such, our deliverables are well-researched, offering a value-add to clients.

Impact

Supporting SPC Consulting means supporting the broader Berkeley community, in consulting and beyond, allowing Berkeley students access to greater equality of opportunity.

Intake

Working with SPC ensures your company access to top talent for internship programs and full-time roles gradually building out a robust pipeline into your company.

Project Logistics

Pre Semester	Week 1-2	Week 3-5	Week 6-8	Week 10-12
Phase 1 Client Onboarding	Phase 1 Team Setup	Phase 2 Project	Phase 3 Midway Check	Phase 3 Final Deliverable

Communication & Logistics

There is an open line of communication between the SPC team and your team

Team Structure

2 Project Leaders
4-6 Consultants

} 2-3 Senior Advisors

We've worked on numerous past projects

New Verticals

Designed a novel ecosystem of fintech products to appeal to environmentally conscious users

Product Management

Developed Uber for Teens leveraging 1M+ data points from focus groups and surveys

Retention Strategy

Designed internal pulse survey system projecting 15% retention lift and \$300K in cost savings

R&D – Fusion Data Intelligence

Prototyped FDI pipelines and analytics frameworks across ERP, CX, and SCM modules; supported architectural research for startup integrations.

Data Pipeline Design

Designed comprehensive long-term data pipeline by interviewing Mattel employees and tracking down data across the company

Recruitment Optimization

Enhanced Dropbox's HR by updating internal platforms and leading user interviews, competitor research, and efficiency audits.

AI Enablement

Developed plan for deploying internal AI tools to enhance PM productivity and optimize cross-team project handoffs.

Pricing Analysis

Developed fair pricing models for 400K+ organic farmers, modelling historical data

Expertise & Capabilities

01.

Product Research

- Consumer Insights
- Pricing Factors
- Product Features

02.

Data Analysis

- Survey Analytics
- Data Collection
- A/B Testing

03.

Marketing

- Marketing Channels
- Ideal Customer Profiles
- Brand Strategy

04.

Business Model

- Cost Structure
- Supply Chain
- Financial Analysis

Donations

SPC is a 501(c)(3) nonprofit UC Berkeley organization.

All payments directly support education, product innovation, and professional development. As a result, clients act as donors, and payments are tax-deductible.

Client Payment Use Cases

- Professional development
 - PM workshops
 - Networking events
 - International Summits
- One or two pro-bono projects each semester with a nonprofit
- Research subscriptions for research-heavy projects and other resources needed for consulting projects.

SPC typically receives a **flexible donation** determined by the client

Uber Case Sample

Project by Software Product @ Cal

Project Overview/Objective

Software Product @ Cal partnered with Uber to help launch the Uber for Teens initiative, an innovative product to expand ride-sharing access to teenage users. Our team played a key role in initiating the project on Uber's platform, conducting user-centered research, and proposing core product features tailored to teens and guardians. This case study outlines our strategic involvement, actionable solutions, and the lasting impact of our contributions to the platform's development and user trust.

EXPAND USER ACCESS

Develop a safe onboarding experience for new users

INCREASE BRAND TRUST

Build features that serve as safety signals for parents and teens

SOLUTIONS IMPLEMENTED

We applied a user-centered design focusing on behavioral research and competitive benchmarking to shape an MVP that would pass both internal and external thresholds.

- Conducted Focus Groups with Teens and Parents (6 sessions, 30+ participants)
- Analyzed Survey Results Using Over 1M+ Data Points
- Benchmarked Safety and Activation Features (vs. Waymo, Lyft)
- Proposed MVP with Core Features:
 - Guardian Approval for Rides
 - Real-Time Trip Tracking
 - In-App Safety Alerts
- Designed a 3-Phase Feature Rollout Roadmap
- Presented Stakeholder Pitch Deck With Community Feedback

ENHANCE MARKET POSITION

Enabled Uber to safely expand to a previously under-engaged market segment by:

- Creating a trust-centric UX aligned with brand values
- Onboarding new users without compromising existing trust-based frameworks
- Operationalizing a roadmap from MVP to full-scale deployment

Conclusion

The collaboration between Uber and Software Product @ Cal demonstrates how student-driven innovation can generate substantial real-world impact. The initiative enabled entry into a new user segment, teen riders, resulting in over \$7 million in revenue as of Q2 2025. This growth was driven by teen user activation and reinforced long-term brand trust and retention among family users.

Our team played a foundational role in launching the Uber for Teens initiative, contributing research, feature strategy, and stakeholder alignment that brought the concept to life. This case study illustrates the powerful value of empowering students to address pressing product challenges and deliver user-centered solutions that scale.

A photograph of a large, ornate metal archway at dusk. The archway is made of dark metal with intricate scrollwork and is supported by two large stone pillars. Each pillar has a spherical light fixture on top. The archway leads to a paved walkway where several people are walking. In the background, there are trees and a building with a classical facade. The sky is a deep blue, and the overall scene is dimly lit, suggesting twilight. The text "Thank you!" is overlaid in the center of the image in a large, white, sans-serif font.

Thank you!
